

LOST

BRING THEM HOME

BackHome BioTec™

After well over a decade of successful involvement in the Pet Electronic Identification (EI) market, **VIRBAC** is proud to introduce an upgrade to the current **BackHome** EI programme which is available in 18 countries worldwide.

TRANSPONDER

- 80 % reduction in migration
- high grade surgical acrylic capsule
- 20 % lighter than glass
- beveled end

IMPLANTER

Unique ergonomically designed single use implanters. The no-return click system ensures that the transponder is not aspirated back into the needle after implantation

REDUCED MIGRATION

BackHome BioTec™ transponders in the ready to use implanters are available in cartons of 10 COMPLETE, STERILE units. The packs include registration forms and collar tags.

MAKE SURE THEY GET BACKHOME
